

My Lists in ISearch

Save **Titles and links to database articles** in your own saved lists.

If not logged in, create a **temporary list**. *Temporary lists exist as long as the ISearch session is open in your browser.*

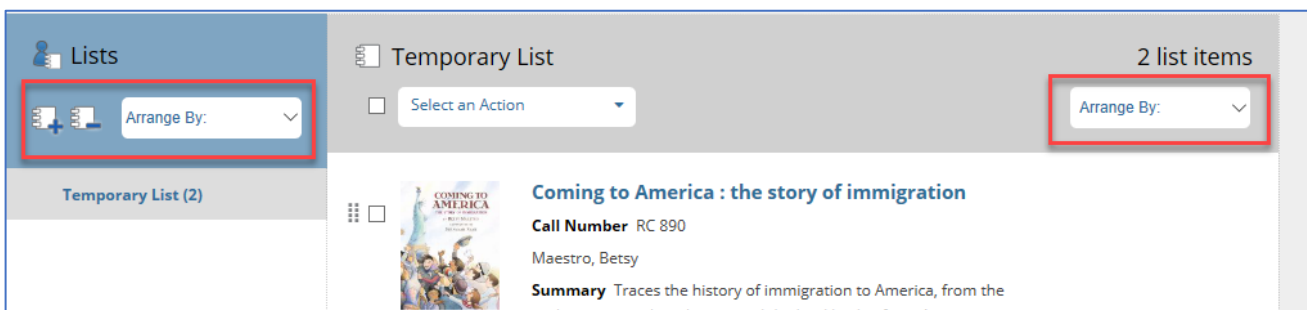

Log in to MY ACCOUNT to **move** temporary items to a **permanent list** that is saved after your current ISearch session is over.

Several **Actions** are available to **select** for your **Lists**:

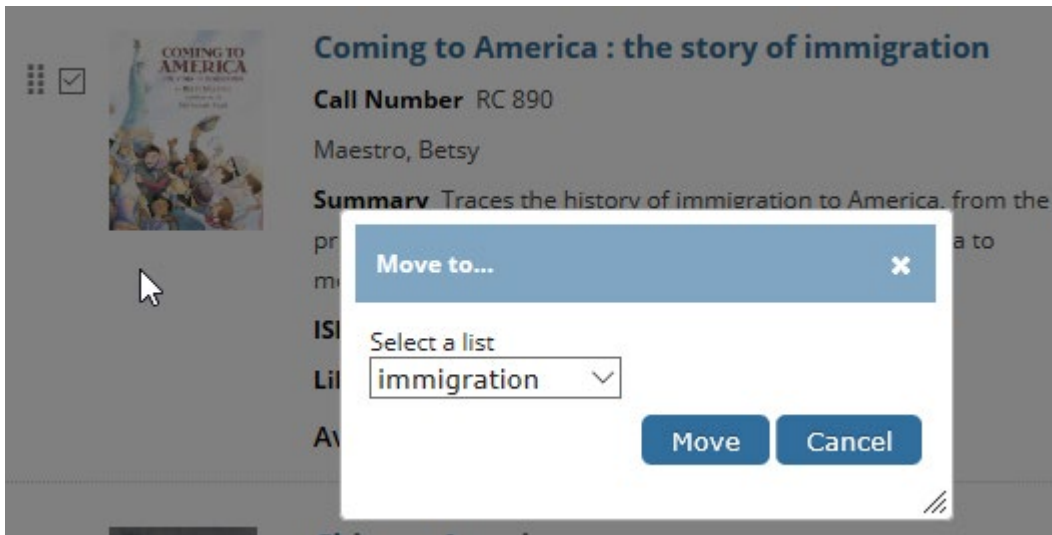

- create a *text screen* that can be printed or a *list* that can be emailed
- *re-arrange* the list on the right by name and date
- select *individual items* for listing or emailing
- or select *all items* with the checkmark at the top

On the left, **Add List**, create and arrange your permanent lists *entering* a name of your choice.

Choose which items to move or copy from your temporary lists to your permanent lists.

My Lists are saved in your *My Account*. **Maintain** your lists by creating new (+) or deleting old (-) lists.
